Electrical Manufacturing 1990 Article Index

Articles

January

Keeping U.S. Manufacturers Globally Competitive: From World Class Motion Control to World Class Plants 13
Switch/Relay Industry Outlook 16
High Voltage Power Supply Manufacturing for Aerospace Applications 18
Measuring the Unmeasurable: Test Methods for Coil Losses 24
Using Electronics to Revolutionize Electrical Motor Design 31
A Motion Control Primer 34
Electrical Appliance Circuitry Design to Eliminate Potentially Dangerous EMF Effects 36

March

Cooper Outlook: A Decade of Stability? 5
Technology and Trends in the Motor Industry 11
Proportional Controllers, A Case Study 13
Testing Armature Balance: Correction Methods 15
Implementing SPC Under Hostile Conditions 19
Contact Material: Proper Selection For Optimum Device Performance 23

May

Trends in Miniaturization and Materials Will Challenge Vacuum Casting Equipment Manufacturers 11
Microfabricated Electric Motors 23
Want to Make a Change? First Use SPC to Prove It's Better 31
Dynamic Testing of Small Motor Commutators 35
Battery Technology Update 40
A Comparison of Magnetic and Electronic Ballasts: Part I 45
Ceramic Multi-Layer Capacitors In Power Applications 53

July

Electromagnetic Meissner-Effect Launcher 13
Using Time Delay Relays to Improve Programmed Controller Efficiency 14
Simultaneous Engineering Speeds Market Entry, Cuts Lead Time for Automated Assembly Machinery 16
Advances in Insert Molding Equipment Improves Component Assembly 25
Electronics Create New Demands For In-Plant Power Conditioning Equipment 27
Flexible Insulation Laminates For Rotating Equipment 33
A Comparison of Magnetic and Electronic Ballasts Part II 43
How to Use Analysis of Variance In an Industrial Application 51

September

Selecting Cable Ties for Difficult Chemical and Physical Environments 15
High-Voltage Power IC Technology Increases Current Density for Power Control and Conditioning 19
Hyperbolic Connector Terminal Design for High Amperage Applications 23
Control Circuit for Two Stepping Motors 28
Detroit Gives New Life to the Coil Winding Industry 31
Industrial Secondary Batteries in Utility and Other Standby Applications 39
Motor Suppliers Respond to Changing User Requirements 46
Monitoring Power Quality 51

November

The Electrical Manufacturing Industry Forecast 12
A Transformer Tutorial 17
Arbitrary Waveform Generation 23
Circuit Regulates Speed of DC Motor 28
Polymers That Conduct Electricity 31
Analysis of Variance in an Industrial Application, Part II 41
Solventless Varnish Provides Engineering and Manufacturing Options in the Production of Electromagnetic Devices 45
